

<b>I. Scientific quality</b>				
<b>A. Candidate + consortium</b>	<b>Poor</b>	<b>Fair</b>	<b>Good</b>	<b>Excellent</b>
<i>1. Scientific knowledge and coaching</i>				
	<input type="checkbox"/> Manifest gaps and shortcomings in the knowledge of the state-of-the-art, <b>or</b>  <input type="checkbox"/> The guidance and mentoring provided are judged inadequate.	<input type="checkbox"/> Fair but incomplete knowledge of the state-of-the-art; this does not pose any risk for the implementation of the project, <b>or</b>  <input type="checkbox"/> The guidance and mentoring for the implementation of the project is reasonable (additional attention is needed to guide the candidate).	<input type="checkbox"/> Very good knowledge of the state-of-the-art within own field of research, <b>and</b>  <input type="checkbox"/> The guidance and mentoring for the execution of the project is adequate.	<u>Requirements good +</u> <input type="checkbox"/> Very good knowledge of the state-of-the-art, even outside own field of research.
<i>2. Reasoning skills and critical-scientific mindset</i>				
	<input type="checkbox"/> Reasoning skills and/or critical mindset are poor, <b>or</b>  <input type="checkbox"/> He/she is unfamiliar with the topic of the project. Insufficient insight in the relevance of the proposed research strategy and techniques, <b>or</b>  <input type="checkbox"/> Poor motivation, not based on a fundamental interest in the proposed project.	<input type="checkbox"/> Moderate reasoning skills or critical mindset, <b>or</b>  <input type="checkbox"/> Moderate to sufficient insight into the relevance of the proposed research strategy and techniques, <b>or</b>  <input type="checkbox"/> Moderate motivation.	<input type="checkbox"/> Reasoning skills and critical-scientific mindset are good; can present new concepts based on well-founded arguments; <b>and</b>  <input type="checkbox"/> He/she has a good insight in the proposed approach and techniques; <b>and</b>  <input type="checkbox"/> Convincing and motivated candidate.	<input type="checkbox"/> Very good reasoning, very good critical-scientific mindset; can present new concepts in a very sound manner; <b>and</b>  <input type="checkbox"/> He/she has an excellent insight in the proposed approach and techniques; candidate knows exactly what he/she will do and why; <b>and</b>  <input type="checkbox"/> Very convincing and motivated candidate; he/she is the driving force behind this project.

B. Project	Poor	Fair	Good	Excellent
1. <i>Scientific quality level and challenges (including clarity innovation goal)</i>				
	<ul style="list-style-type: none"> <li><input type="checkbox"/> The proposal is rather a catch-up effort relative to the international state-of-the-art, <b>or</b></li> <li><input type="checkbox"/> The innovation goal is completely unclear or no milestones are defined for phase 1, <b>or</b></li> <li><input type="checkbox"/> The necessity of implementing a first phase is completely unclear.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The added value of the proposal relative to the international state-of-the-art is acceptable, <b>or</b></li> <li><input type="checkbox"/> The innovation goal is acceptable, but shows important shortcomings in terms of clarity and verifiability, or the milestones to be reached in phase 1 are not defined clearly enough, <b>or</b></li> <li><input type="checkbox"/> The evidence of the necessity of implementing a first phase is rather weak.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The project builds upon and extends the international state-of-the-art, can be qualified as basic research of high quality, including a good level of risks, challenges and inventiveness, <b>and</b></li> <li><input type="checkbox"/> The innovation goal is clear, to the point and verifiable, and the milestones to be reached in phase 1 are defined concretely (and can be verified), <b>and</b></li> <li><input type="checkbox"/> A first phase is required. Risks are too high to transfer results immediately.</li> </ul>	<p><u>Requirements good +</u></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> The proposal is highly innovative and unique, and offers a substantial added value relative to the international state-of-the-art (“pioneer project”); the proposal demonstrates a very high level of scientific risks and shows clear inventive and challenging ideas, concepts and strategies.</li> </ul>
2. <i>Quality of the research approach and feasibility</i>				
	<ul style="list-style-type: none"> <li><input type="checkbox"/> The research approach and the project planning display serious flaws and shortcomings, <b>or</b></li> <li><input type="checkbox"/> There is a mismatch between the research goals and the research approach, <b>or</b></li> <li><input type="checkbox"/> Crucial challenges are not identified, <b>or</b></li> <li><input type="checkbox"/> The feasibility is low, <b>or</b> the scientific project goals are expressed in an insufficiently clear manner to allow an assessment of their feasibility within the project.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Research approach and planning are reasonable, but contain some shortcomings, <b>or</b></li> <li><input type="checkbox"/> The research approach offers only a limited contribution towards the scientific goals (or insufficient focus on the crucial aspects), <b>or</b></li> <li><input type="checkbox"/> Not all challenges have been identified; this has a clear impact on the attainment of the scientific goals, <b>or</b></li> <li><input type="checkbox"/> The feasibility is not realistic, but it is likely that the scientific goals will be partially reached.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The research approach is well suited for reaching the research objectives; risks were identified and the research planning is clear, <b>and</b></li> <li><input type="checkbox"/> The project as planned is feasible within the timeframe of the project.</li> </ul>	<p><u>Requirements good +</u></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> The research approach includes a thorough identification of the research risks, with alternative research strategies and “fall back” research options.</li> </ul>

<b>II. Valorization</b>				
<b>A. Candidate + consortium</b>	<b>Poor</b>	<b>Fair</b>	<b>Good</b>	<b>Excellent</b>
<i>1. Insight in the strategic importance of the project (for companies/sectors) and valorization</i>				
	<input type="checkbox"/> Limited insight in the strategic importance of the project, <b>or</b> <input type="checkbox"/> Limited knowledge of the market potential or valorization path, <b>or</b> <input type="checkbox"/> Limited insight in the bottlenecks and strengths to ensure the applicability of the results.	<input type="checkbox"/> Rather limited insight in the strategic importance of the project, <b>or</b> <input type="checkbox"/> Rather limited knowledge of the market potential or valorization path, <b>or</b> <input type="checkbox"/> Rather limited insight in the bottlenecks and strengths to ensure the applicability of the results.	<input type="checkbox"/> Good insight in the strategic importance of the project, and the bottlenecks and strengths to ensure the applicability of the results, <b>and</b> <input type="checkbox"/> Good knowledge of the market potential and the valorization path.	<input type="checkbox"/> Very good insight in the strategic importance of the project, and the bottlenecks and strengths to ensure the applicability of the results, <b>and</b> <input type="checkbox"/> Very good knowledge of the market potential and the valorization path.
<i>2. Commitment for valorization (including cooperation with industry/industrial mentor)</i>				
	<input type="checkbox"/> The candidate shows no motivation to interact with the industry/industrial mentor or to develop complementary skills to bring the results into practice.	<input type="checkbox"/> The commitment of the candidate is moderate to pay enough attention to the applicability of the results and to interact actively with the industry/industrial mentor.	<input type="checkbox"/> The candidate is clearly motivated to pay attention to the applicability of the scientific results and to interact actively with the industry/industrial mentor; there is a clear personal commitment of the candidate to develop skills in this matter.	<u>Requirements good +</u> <input type="checkbox"/> The research group has a good track record with regard to transfer and/or actual utilization or follow-up R&D-projects funded by industry.

Project – Phase I (assessment of the **broad** applicability of the results)

<b>B. Project</b>	<b>Poor</b>	<b>Fair</b>	<b>Good</b>	<b>Excellent</b>
<i>1. Strategic importance of the research approach for the applications (valorization objectives)</i>				
	<ul style="list-style-type: none"> <li><input type="checkbox"/> There is an evident mismatch between the planned execution of the research project and the opportunities for valorization, <b>or</b></li> <li><input type="checkbox"/> The project is only focused on knowledge creation without a prospect for or contribution to applications.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The research approach is only partially relevant for the valorization objectives. Either the content of the proposal is not the optimal path to reach the intended valorization opportunities, or only a part of the project is relevant for the intended applications.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The research approach is well-thought through and relevant for the planned applications. If successful, the results will effectively contribute to turning the valorization objectives into reality.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The project approach is the best conceivable way to achieve the intended application. The target applications are clearly the driving force behind the research approach.</li> </ul>
<i>2. Size and probability of the expected valorization (in case of scientific success)</i>				
	<ul style="list-style-type: none"> <li><input type="checkbox"/> The intended applications are not clear, or are of little economic relevance (valorization = unlikely), <b>or</b></li> <li><input type="checkbox"/> The valorization is primarily focused on companies based outside Flanders and is very limited for Flanders, <b>or</b></li> <li><input type="checkbox"/> Substantial bottlenecks or risk factors are evident, the impact on the valorization potential is not tackled sufficiently in the project proposal, or the bottlenecks are difficult to resolve.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The project offers possible applications, but with a relatively low probability, or the project is targeted at a problem with limited economic applications, <b>or</b></li> <li><input type="checkbox"/> The possible valorization in Flanders is inherently limited, <b>or</b></li> <li><input type="checkbox"/> Potential bottlenecks, barriers and risk factors are only partially discussed in the proposal, but may be manageable.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> A good potential is demonstrated, is realistic and thoroughly substantiated (high probability), <b>and</b></li> <li><input type="checkbox"/> The targeted valorization in Flanders is realistic and thoroughly substantiated as well, <b>and</b></li> <li><input type="checkbox"/> Potential bottlenecks, barriers and risk factors were analyzed proactively in the proposal, and are almost absent or manageable.</li> </ul>	<p><u>Requirements good +</u></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> The project offers a range of applications with a clear strategic value for a large group of companies and/or sectors, <b>or</b></li> <li><input type="checkbox"/> Many companies, which are capable of applying the results, are present in Flanders, <b>or</b></li> <li><input type="checkbox"/> Strong starting position, important assets for the valorization.</li> </ul>

Project – Phase 2 (assessment of the **potential for the industrial partner**)

<b>III Valorization potential for the industrial partner</b>				
<b>B. Project</b>	<b>Poor</b>	<b>Fair</b>	<b>Good</b>	<b>Excellent</b>
<i>1. Strategic importance of the project for the company</i>				
	<ul style="list-style-type: none"> <li><input type="checkbox"/> The strategic importance of the project for the company is unclear, <b>or</b></li> <li><input type="checkbox"/> It is clear that no interactions have taken place or are being planned between the candidate and the industrial mentor.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The strategic importance of the project for the company has been estimated too optimistically, <b>or</b></li> <li><input type="checkbox"/> Certain gaps and shortcomings are present in the description of the potential applications for the company, but their presence can be expected, <b>or</b></li> <li><input type="checkbox"/> Limited interactions have taken place or are being planned between the candidate and the industrial mentor.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The project has a clear impact on the valorization and the scientific results can have a clear added value for the company, <b>and</b></li> <li><input type="checkbox"/> The proposal shows that there has been a good interaction with the company and also during the project execution sufficient interactions are planned.</li> </ul>	<p><u>Requirements good +</u></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> The project can result in an important diversification for the company, or in a new technology platform with many potential applications, <b>or</b></li> <li><input type="checkbox"/> During the project execution a substantial amount of time is spent by the candidate in the company.</li> </ul>
<i>2. Size and probability of the expected valorization (in case of scientific success)</i>				
	<ul style="list-style-type: none"> <li><input type="checkbox"/> The valorization potential for the company has not been described, <b>or</b></li> <li><input type="checkbox"/> Very limited realistic market expectations, or the company will lack the required capabilities for valorization, <b>or</b></li> <li><input type="checkbox"/> Unclear/uncertain which parts of the value chain are located in Flanders, or whether there will be sufficient valorization in Flanders, <b>or</b></li> <li><input type="checkbox"/> Substantial risk factors are evident, the impact on the valorization potential is not tackled sufficiently in the project proposal, or the bottlenecks are difficult to resolve.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The potential for the company is only summarily described, <b>or</b></li> <li><input type="checkbox"/> Shrinking market, or market outlook unclear, or the competition has significantly more comparative advantages, <b>or</b></li> <li><input type="checkbox"/> Limited parts of the expected value chain are located in Flanders, <b>or</b></li> <li><input type="checkbox"/> Potential bottlenecks, barriers and risk factors are only partially discussed in the proposal, but may be manageable.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> A good potential for the company is demonstrated, <b>and</b></li> <li><input type="checkbox"/> The company has a good competitive position in the expected valorization process, <b>and</b></li> <li><input type="checkbox"/> Important parts of the value chain are located in Flanders, <b>and</b></li> <li><input type="checkbox"/> Potential bottlenecks, barriers and risk factors have been proactively analyzed in the proposal, and are almost absent or manageable.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The targeted valorization for the company is realistic, extensive and thoroughly substantiated, <b>and</b></li> <li><input type="checkbox"/> The company has significant comparative advantages in the target market, <b>and</b></li> <li><input type="checkbox"/> The value chain will principally be located in Flanders, <b>and</b></li> <li><input type="checkbox"/> Strong starting position for IPR, including “freedom to operate”, essential for the valorization chances.</li> </ul>
